

## Robomow Robotic Lawn Mower

**What It Is:** No, this isn't an episode of The Jetsons, but it sure feels like it: Robomow is a robotic, automatic lawn mower. Think of it as a Roomba for your yard.

**Why We Love It:** Robomow mows your lawn — while you sip a cocktail on your deck.

**Must-Try Tech:** Robomow comes with an app that lets you control the mower from a distance. Adjust your settings, set your mower's weekly schedule, and more. It can tackle slopes up to 20 degrees, and knows to return to its base if it starts raining. A unique PIN code keeps your neighbor from borrowing it without asking. Robomow also includes an edging mode, meaning you can say goodbye to your loud trimmer.

**Cost:** Ranges from \$1,099-\$2,099 depending on model.

**Get It:** We're giving away a Robomow RS622! Visit [bhg.com/robomow](http://bhg.com/robomow) before June 30 for your chance to win.
